# 6 Safety tips for Working at Heights

IDENTIFY HAZARDS

Before you start work, you need to check for any hazards in the area.
If you find a hazard you need to do something to control it.

SAFETY EQUIPMENT

- All safety systems and equipment must be installed and regularly checked by a competent person
- Always use the appropriate equipment

CONTROL HAZARDS

- What is the chance that the hazard will hurt someone or cause damage?
- It does happen, how bad will the injury or damage be?

PERSONAL PROTECTIVE EQUIPMENT

PPE needs to be:
- Kept in good condition.
- Replaced if damaged or defective.
- Worn correctly.
- Adjusted to fit.
- Properly maintained

REVIEW SAFE WORK PRACTICES

- Conduct regular risk assessments
- Monitor and review practices regularly

REPORT ALL FAULTS

- Tag and remove damaged/faulty items.
- Record the problem.
- Report the problem.make the workplace safer.
